Skills

Javascript, Typescript
Intermediate

Frontend Web Development
Intermediate
HTML, CSS, Next.js, React.js

Backend Web Development
Intermediate
Node.js, MongoDB, PostgreSQL, AWS,
Docker, Redis

Recognitions

Valuable Gem Awards 2025
Elite Performer 2026

Full Stack Developer and expert in running AI software development agents. I combine deep React/Node.js experience with AI-assisted workflows to ship features faster — from scoping and implementation to review and production. Focused on solving complex problems, delivering reliable systems, and meeting client needs.

Experience 5 years

GAMMASTACK Remote
Senior Solution Engineer AI-Augmented Delivery April 2024 - Present

- Built and ran AI agentic development workflows with Cursor, Copilot, and LLMs — breaking features into agent tasks, steering multi-step implementation, and reviewing agent output before shipping to production.
- Led B2B and B2C development of multiple custom gaming projects, including Crash, Plinko, and Dice, ensuring seamless frontend experiences and scalable backend integrations.
- Architected and optimized real-time gaming mechanics, implementing WebSockets, Redis, and worker queues to enhance performance and maintain low-latency interactions.

Solution Engineer June 2022 - April 2024

- Developed engaging and interactive user interfaces for various betting games in the iGaming domain, including Aviator, Crash, Plinko, and HiLo.
- Transitioned to back-end development, optimizing server-side logic in Node.js and building fast and reliable servers.
- Built REST APIs using Express in Node.js
- Engineered a Twilio Flex-based call center tailored to meet specific client requirements.
- Integrated CRM tools like Hubspot in Twilio Flex.

Quest Global Technologies Pvt Ltd Remote
Software Developer Oct 2021 - June 2022

- Solo handled front-end part of multiple projects (related to Blockchain, ICO platform, NFT marketplace, etc.).
- Integrated crypto wallet flows into dApp UIs (connect wallet, account state, and transaction-related user journeys) for seamless Web3 interactions.

Projects

iGaming projects

Developed dynamic UIs with React and Redux Toolkit for these games

Crash (Aviator), Plinko, Mine, Dice, Blackjack, Hilo, Keno, Limbo, Coin-Flip, Tower, etc. for more than 10 Projects.

Implemented real-time game mechanics using WebSockets, optimizing performance for low-latency interactions.

Designed scalable backend APIs with Node.js and Express, integrating game logic and transaction management.

Projects

Anydesk

React, Node, Twilio, Twilio Flex, Twilio serverless

- Worked as both Frontend and Backend Engineer.
- Responsible for building the call centre solution for both technical and sales support for Anydesk using the Twilio Flex platform and Serverless Architecture.

Sephora

Project Description: At Sephora, I was the part of discovery squad, a team dedicated to manage the retail website of Sephora.

- I was responsible for transitioning the existing project to Nuxt.js/Vue3.

TK ELEVATOR (TKE)

React js, Node.js Twilio's Flex, MongoDB

Project Description: TK Elevator GmbH is a company that produces elevators, escalators, moving walkways and accessible solutions. Their requirement was to build a call centre solution for people stuck in emergency situations in the elevator.

Personal Projects

Digital Mandla

Next.js, React.js, Node.js, Typescript, MongoDB, Tailwind, Cloudinary

Project Description: It is a community-driven platform that is presently in the development stage. The aim is to transform various aspects of society, including fostering collaborative communication, supporting local employment, listing houses for rental, and bringing small vendors online to increase their presence, among other initiatives.
